

## Long-lasting relationships.

You're proud of the physical plant you manage. Whether it's a new, state-of-the-art facility or an aging property, your responsibility is to make sure all systems keep running smoothly. Our responsibility is to make that happen.

Eckhardt & Johnson, Inc. has kept industrial, municipal, educational, medical and correctional facilities humming since 1917. We've worked with some customers for over forty years. Thanks to the well-known skill and reputation of our expert technicians, we even get referrals from our competitors.

## What we do.

- Mechanical Design/Construction
- Manufacture, Installation, Maintenance
- Install HVAC (new and upgrades)
- Process Piping (turnkey or component, large or small diameter)
- Boiler Sales, Service, Installation
- Design Build Mechanical Engineering

## So why choose us?

We know other companies do bits and pieces of what we do. But again and again, managers tell us what they really need in a mechanical contractor: trust; quality, on-time performance; and a thorough understanding of all systems. At Eckhardt & Johnson, that's only the beginning.

We're the state's oldest, continually operating, mechanical contractor, yet we stay current with new and expanded services, products and methods. We have the flexibility to design from scratch, install and maintain a process customized to your specific situation. Because we form no exclusive alliances with manufacturers, we can offer the best equipment for the job regardless of make.

Available on short notice, our technicians form a "strong chain of knowledge" so we can easily match the right team to the right project. A fleet of over 20 radio-dispatched service trucks are on call 24/7 to handle any emergency.

Above all, we're a well-respected, stable company that can do it all for you. We like what we do and our people are happy doing it.

Which just might be the best reason of all to rely on Eckhardt & Johnson.

# HVAC, plumbing, and process piping. Since 1917.

Eckhardt & Johnson, Inc.  
MECHANICAL CONTRACTORS

# Preventive maintenance contracts.

You may have learned it the hard way: process shutdowns are very costly. Our goal is to prevent problems by keeping your equipment in proper working order.

Preventive maintenance contracts typically involve twice-yearly servicing of components such as filters and coils. This allows us to keep your systems in tip-top condition and instantly identify any developing maintenance situations that could cause system failure.

- On-time repairs minimize downtime
- Maximize production
- Schedule service for minimal plant disruption
- Work during off-hours as needed

If you're building or renovating, we design, install and maintain all HVAC and plumbing equipment. Our full-spectrum service makes sure systems are designed to best meet your needs and are correctly installed and maintained.

# Cost-saving contractor.

We know you could try doing this in-house. But examine the cost. Even the best technician can't "know it all"; you'd need a large staff, including some highly-trained people with salaries to match.

Because we're a contractor, we can put a well-rounded team to work for you at a price you can afford:

- Certified Welders
- Licensed Plumbers – Masters, Journeymen, Apprentices
- Certified Refrigerant Transition and Recovery Technicians
- Certified Medical Gas Installers

As your contractor, we offer reliability in meeting tight deadlines and special requirements. You avoid the overhead of storing, maintaining and updating the state-of-the-art equipment we use every day. We help you stretch already-thin resources even further.
